Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Guynn on 7/20/06.

The following changes have been made:

- 1) Claim 1, first line, "use in" has been deleted.
- 2) Claim 18, first line, "the" has been deleted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art of record fairly suggests, teaches or discloses the glass compositions of the claims as currently amended.

As previously discussed, the art initially given an "X" designation by the ISA (but subsequently withdrawn) relates to optical glasses which would be chemically inert, and thus

Art Unit: 1614

could not possibly release water soluble fluoride over time in amounts effective to treat dental caries as instantly claimed.

As currently amended, the claims are drawn to phosphate glasses. Various prior art documents of record disclose fluoride releasing glasses based on other types of glass, *e.g.* bioactive silicate glasses containing a minor amount of phosphorus (*e.g.*, the various Litowski patents), or carbonate glasses (the Toumba thesis). As explained throughout the instant disclosure and factually verified by the experimental data presented in the working examples, the instant phosphate glasses are unexpectedly superior in treating caries to such prior art glasses. See specifically the instant specification at paragraphs [07], [08], [059] and [069].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
